

What is Early Head Start?

Early Head Start is a comprehensive family development program that promotes the physical, cognitive, social and emotional growth of infants and toddlers. At **Root for Kids**, we recognize that parents and care givers are the most influential teachers in their child's health and development, as they are their children's most important teacher.

In addition to supporting infant and toddlers, the Early Head Start program supports families in meeting their own personal goals and achieving self-sufficiency across a wide variety of domains, such as housing stability, continued education, and financial security.

Services

- Weekly individualized home visits
