

## What is Early Intervention?

Early Intervention is a combination of services that support caregivers of infant and toddlers birth to 36 months who have a disability, developmental delay or a specific health condition that is strongly linked to a developmental delay.

Root for Kids conducts a comprehensive evaluation including hearing, vision, health and developmental.

## Services

- Special instruction
- Parent/family training and support
- Physical/occupational therapy
- Speech-language services
- Hearing and vision services
- Nutritional services
- Nursing

All services take place in the child's natural environment and are tailored to meet the individual needs of the child and family.

# Is your child meeting his/her developmental milestones?

Most babies by...

**10 weeks** Startle to sound / Begin to coo / Hold up their head / Look at objects

**6 months** Reach and grasp objects / Look towards sound / Babble / Roll over

**9 months** Continue to babble / Sit alone while playing with a toy / Begin to crawl

**1 year** Take their first steps / Respond to their own name / Say "ma-ma" and "da-da" with meaning / Point with their index finger

**18 months** Walk alone well / Build a tower of three blocks / Say 10 to 15 words / Point to body parts / Enjoy simple pretend play

**2 years** Use words to communicate / Walk up stairs / String large beads / Place a circle in a puzzle / Use 2-word sentences

**2 1/2 years** Participate in nursery rhymes / Understand big and little
